

DUAL OVENABLE MEAL TRAY BEST PRACTICE

Dual ovenable meal trays gives your customers ultimate flexibility on how they want to heat and eat their meal and they are home compostable too! Ideal for ready meals, vegetables, salads and desert applications. The trays are printed with a water-based ink which has moisture resistant properties.

Top Tips for you and your customers regarding Paperboard Meal Trays:

- For best results, cook meal in another vessel and serve into trays when meal has been cooled
- Meals should not be cooked in trays before sale
- Meals can be frozen in these Paperboard Meal Trays but do not thaw prior to cooking
- Meals should be taken directly from freezer to oven
- Meals are best cooked in oven from frozen
- Meals can be cooked in microwave or conventional oven
- Ovenable at temperature up to 210° C for 30 minutes
- Remember to remove the rPET lid before placing in oven/microwave
- Meal Trays hold a variety of food applications either hot or cold

Note these trays are all made from Paperboard with Home Compostable certification once finished eating your meal remove any excess food from tray and compost at home or local compost facility.
